Coresuite Benelux Package

The **coresuite country package** contains our most important **coresuite** standard AddOns and country specific features such as marketing layouts and financial reports.

- **Advanced Printer- and Layoutmanagement**

coresuite designer is the optimal printing and reporting tool for SAP® Business One, which enables you to fulfill your reporting requirements in no time. Owing to its individual configuration possibilities, **coresuite designer** is irreplaceable for SMEs.

- **Finance Reports**

coresuite accounting simplifies the work of the finance department. You can finally get account statements, account plans, budget reports or simply balances profit and loss accounts at the touch of a button.

- **Easy search engine for SAP Data**

Imagine that searching for data in your SAP® Business One were as easy as searching for it on the Internet with Google. The new **coresuite enterprise search** from **coresystems** is based on these fundamental thoughts. Now you can access all your SAP® Business One objects in a flash.

- **Customizings quick and easy without any programming knowledge**

coresuite customize is the ideal working tool when you need to make individual adaptations to a new or existing SAP® Business One environment. It enables you to expand Business One processes, adapting them to your company's internal processes. This means simplifying both the system's usability and your daily activities.
